

1. Introduction

In the present web applications are very helpful to make the human life easier. Banking websites, shopping websites, education websites, social media websites are some examples for those web applications. There are so many coding languages to implement a web application. Among them, some of most popular coding languages have given below,

1. HTML
2. CSS
3. JavaScript
4. Java
5. Python
6. SQL
7. PHP
8. .NET
9. Angular

In the in this project, we try to implement a medical web application using Java beans, Java Servlets and Java Server Pages (JSP) using the NetBeans IDE (8.0.2).
